

Lesson 63: Preparing for Abstract Classes (W21D2)

Balboa High School

Michael Ferraro

January 20, 2016

- Join your partner and load up Magpie4.
- Demonstrate your chatbot's responses to these phrases:
 - I want a million dollars.
 - I want to rob a bank.
 - I love you.
 - I love to love you.
 - I LOATHE YOU.
 - I like Yousef.

Students will finish the Magpie Lab and work on Problem Set #11 exercises to prepare them to learn about abstract classes.

Wrapping up Magpie

Let's look at your teacher's solution: [Magpie4.java](#)

Starting PS #11

- PS #11, §§1-2 (to be finished for HW)
- See reading [here](#)
- Note: There is a lot of text in this problem set. Make sure you read it all and ask questions about what you don't get! (It replaces quite a bit of the textbook reading.)

Finish all of PS #11, §§1-2, inclusive.
