

# Lesson 86: GUI Calculator (W30D3)

Balboa High School

Michael Ferraro

March 23, 2016

# Do Now

- Fill out a book card for the AP review book (details on board).
- Preview today's project: [BasicCalculator.jar](#).
- Create a new project called GUI-Calculator.
- Add a new JFrame class called Calculator.
- Follow the instructions [here](#) to make a working GUI calculator. Feel free to work alone or with a partner. (This is your task for the period.)

# Aim

Students will attempt to build a GUI calculator application and receive AP exam review books.

Try to make a feature-complete calculator by improving upon what you built in class today.
