

§ 1.2: Basics of \sphericalangle 's

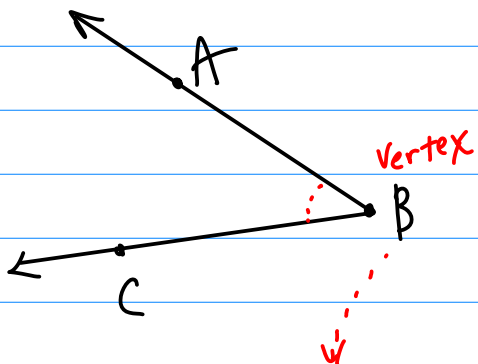

• Measuring \sphericalangle 's

• Classifying \sphericalangle 's

Naming \angle 's:

~~$\angle B$~~ ~~$\angle A$~~ $\angle \underline{A} \underline{B} \underline{C}$
 $\angle \underline{C} \underline{B} \underline{A}$
 ~~$\angle \underline{C} \underline{A} \underline{B}$~~

$\angle 2$
 ~~$\angle J$~~ $\angle \underline{K} \underline{J} \underline{N}$ $\angle \underline{N} \underline{J} \underline{K}$

* Adjacent \angle 's:

$\angle 1$ is adjacent to $\angle 2$.
